

ANTONELLO TOTARO

Global GTM Leader · Solo Revenue Engine · Platform Engineering · AI-Native Builder

Barcelona, Spain · Remote-Global · antonellototaro@gmail.com · linkedin.com/in/antonello-totaro-21bb87a2 · github.com/vibeanto-hus

\$600k+ Partner Deal · \$464k+ Solo ARR · 20x MVP Price Uplift · 6 Continents · 14→1 GTM Team · 4 Languages

SUMMARY

AI-augmented GTM leader with 4+ years at Humanitec covering every revenue function simultaneously — SDR, Account Executive, Head of Sales, GTM Leader, and Marketing — solo, 100% remote, across 6 continents. Every new logo since 2021 was sourced by me; since Q4 2024 I have owned the full revenue motion end-to-end. I repriced the product motion 12–20x, built a partner channel that produced a landmark \$600k ARR joint deal, replaced a \$400k paid-ads budget with a demo engine that scaled to 160+ global attendees, and shipped TONI CRM — an AI-native pipeline tool — to automate the workflow behind it all.

SKILLS

GTM & Revenue

Enterprise GTM strategy · Full-cycle sales engineering · Account Executive (AE) · SDR / outbound · Head of Sales · Channel & partnerships · RFP / RFI management · Contract & pricing strategy · Revenue operations

CRM & Sales Tools

HubSpot · Salesforce · Salesloft · Microsoft Dynamics · Attio · Amplemarket · Reply · Outreach · ZoomInfo · Apollo · FullEnrich · RB2B · TONI CRM (built)

AI & Automation

Claude Code · Claude API · MCP · Agentic Orchestration · Codex · Perplexity · NotebookLM · AirOps · Zapier · N8N · prompt engineering · AI workflow design

Development & Cloud

Python · Node.js · HTML · CLI · GitHub Enterprise · GitLab · AWS · Azure · GCP · Supabase · Vercel · Terraform · PostgreSQL · Redis · CI/CD · Open-source contributor (CNCF ecosystem)

Platform Engineering

Humanitec Platform Orchestrator · Backstage (CNCF) · IDP architecture · Terraform state management · Azure authentication · Docker

Regulated Industries

Banking · Insurance · Telecom · Defense · Energy · Life Sciences · Government (LATAM, EU, MENA) · Media & Entertainment

EXPERIENCE

Senior Sales Engineer & GTM Leader

Humanitec · Platform Engineering / Internal Developer Platform (IDP)

2021 – Present · Barcelona, Spain · 100% Remote Global

Solo GTM Era — 2024 to Present

- Replaced a 14-person GTM team as sole owner of all revenue functions — SDR, AE, Head of Sales, GTM Leader, and Marketing — maintaining deal velocity and quality with zero headcount increase
- Absorbed full marketing ownership from August 2025: campaigns, sequences, content, and brand — zero agency dependency, zero paid-ads budget
- **Repriced the entire product motion:** raised MVP from \$999 to \$12k–20k (12–20x uplift) and entry ARR from \$15k to \$45k–90k, lifting average contract value **4.4x above the pre-2024 baseline**
- Closed \$464k+ named ARR across 7 accounts — all sourced, solutioned, negotiated, and closed solo: Mobicom \$90k (+650% from MVP), NHL \$80k, Sartorius \$79k (+558%), Biorelate \$65k (largest per-user price), Hubtel Ghana \$60k (4-week POC), Siigo Colombia \$45k (largest LATAM deal), On Location \$45k (direct ARR)

ANTONELLO TOTARO

Global GTM Leader · Solo Revenue Engine · Platform Engineering · AI-Native Builder

Barcelona, Spain · Remote-Global · antonellototaro@gmail.com · linkedin.com/in/antonello-totaro-21bb87a2 · github.com/vibeanto-hus

\$600k+ Partner Deal · \$464k+ Solo ARR · 20x MVP Price Uplift · 6 Continents · 14→1 GTM Team · 4 Languages

- Handled 14+ enterprise RFPs and RFIs simultaneously — Boeing, BlackRock, Barclays, Fiserv, Amadeus, SoFi, Elsevier, SDAIA, Humain.ai, Atom Bank, Roland Berger, Omnicom, PHRT, GCI — all authored, coordinated, and followed up solo
- Coordinated with product, finance, and legal to align repricing strategy, contract terms, and roadmap commitments with enterprise procurement requirements — ensuring every deal was commercially sound and technically credible
- Built AI-augmented post-demo pipeline (Granola → HubSpot API → ReportLab PDF → Gmail draft) cutting post-call admin to zero — structured deal reports generated automatically before the prospect replies

Product & Technical Contribution — 2021 to Present

- Co-designed the Humanitec Sandbox with the PM team — a self-serve testing environment that reduced time-to-value for trial prospects by eliminating setup friction; design driven by patterns from hundreds of live discovery conversations
- Made active GitHub contributions to Humanitec tooling; built hands-on with Terraform, CI/CD, cloud environments (AWS, Azure, GCP), Node.js, PostgreSQL, Redis, and Supabase — enabling credible technical engagement without additional SE support
- Served as the primary feedback loop between prospect pain and the engineering roadmap; worked directly with the PM to convert deal patterns into product decisions

Sourcing & SE Era — 2021 to 2023

- First point of contact on every new logo from 2021 — drove all accounts from initial outreach through MVP close; collaborative team handled post-MVP delivery and customer success
- Notable accounts opened in this period: Apple · S&P Global Mobility · National Hockey League · Allianz · ABB · Sartorius · OVO Energy · Zilch · Fortescue · BambooHR · Cimpres · On Location (Endeavour) · Biorelate · RLDatix · UDI · Schueco · Mobicom (Mongolia)

PARTNERSHIPS

Kyndryl · 2024–Present

Architected and managed the Kyndryl partnership solo, producing Humanitec's first-ever joint deal offering: a **\$600k ARR contract with Kaiser Permanente**. Subsequently selected by Kyndryl to coordinate globally on **ADIF** (Spanish national railway); actively engaging Kyndryl Spain and ADIF for the February 2027 government investment cycle.

Backstage / Spotify · 2024–Present

Took 100% ownership of the Backstage partnership — including overcoming CEO-level resistance. Positioned Humanitec as the orchestration layer behind Backstage deployments, directly defusing the most common DIY-portal objection pattern in enterprise prospects.

Nagarro · 2024–Present

Identified, qualified, and onboarded Nagarro as a GTM partner, extending Humanitec reach into accounts where Nagarro operates as a trusted digital engineering advisor.

GTM SYSTEMS BUILT

Engineered a full-stack GTM automation system to cover every revenue function solo — replacing \$400k/year in paid ads and a dedicated marketing team, while growing demo attendance from 20 to 160+ global attendees.

- **Autonomous Outbound + Re-Engagement Loop:** Custom Claude Chrome Extension shortcut bypasses HubSpot's 50-lead/page limit, running 4 parallel sequences at 250 leads/day via Claude Haiku — zero manual review. Layered with Amplemarket Duo (pre-loaded with a Humanitec knowledge document, fed by signal triggers: competitor activity, community Slack, events, LinkedIn) for fully autonomous 24/7 outbound. Zapier +

ANTONELLO TOTARO

Barcelona, Spain · Remote-Global · antonellototaro@gmail.com · linkedin.com/in/antonello-totaro-21bb87a2 · github.com/vibeanto-hus

\$600k+ Partner Deal · \$464k+ Solo ARR · 20x MVP Price Uplift · 6 Continents · 14→1 GTM Team · 4 Languages

RB2B identifies all web visitors in real time; Amplemarket and HubSpot trigger re-engagement sequences automatically. All CTAs rationalised to exactly two: Recurring Demo or Sandbox.

- **\$400k → \$0 Marketing Rebuild + Demo Engine:** Eliminated paid ads and whitepaper production; replaced with a recurring monthly demo aligned to live market themes (AI, data sovereignty, security). Built designer-quality HubSpot emails by hand-coding Figma CSS exports to HTML — pixel-perfect at zero premium-tool cost. Scaled from 1 demo/month to 4/month; attendance from 20 (first EU/US) to 160 EU/US + 80 Asia — Humanitec's first global demo program.
- **Post-Call Automation (Granola + Claude):** Every first meeting auto-generates a structured report — timeline, customer goals, tech stack, next steps — with zero post-call admin, delivered before the prospect replies.

PROJECTS

TONI CRM — Solo Founder & Builder · 2024–Present

AI-native revenue intelligence tool for Sales Engineers, built from scratch and in active daily production use. Automates the full post-demo workflow: Granola call notes → HubSpot API sync → ReportLab branded PDF → Gmail draft. Integrates Claude API, MCP server tooling, HubSpot sequences, and Python automation. Built to solve a real problem by the same person using it to close \$45k–\$90k ARR deals across 6 continents.

EARLIER EXPERIENCE

Account Development Representative · 2021

expert.ai · Barcelona

Full-cycle SaaS sales for an AI/NLP platform. Manufacturing-sector campaigns using Salesforce, Salesloft, Outreach, and ZoomInfo. First deep immersion in AI-driven enterprise sales and Director-to-C-level engagement.

SDR & Account Development Associate · 2020–2021

Pulse Secure (IVANTI) + DWCC · Barcelona

Closed 4 enterprise accounts (Fincantieri, Valentino, Costa Crociere, Gucci) at 100 cold calls/day; exceeded quota every quarter. At DWCC: Salesforce and CRM admin across Cyber Security, Supply Chain, DevOps, and AI projects.

Project Manager · 2018–2019

Beyond Pricing · Remote / Global

Travel-tech project management across global client sites; first hands-on technical work with Python, HTML, and ELK Stack for data analysis — the seed of the technical curiosity behind TONI CRM.

Lead Generator & Partnership Manager · 2018–Present

TEDxVarese · Italy (Remote)

Closed 20+ Gold Partnerships with innovative companies in Northern Italy; earliest expression of the partnership instinct later applied at Kyndryl, Backstage, and Nagarro.

Restaurant Manager · 2013–2018

Nando's · Bristol, UK

Managed 15 international FTEs/shift in a top-10 profit restaurant; promoted to management in 8 months. Foundation of the people leadership and operational resilience applied to running solo GTM at scale.

EDUCATION

BTEC Hospitality Management · Pearson College London, Bristol · 2013–2018

Foundation in operations management and people leadership. Complemented throughout career by self-directed learning: Python, Terraform, CI/CD, cloud infrastructure, AI tooling, and platform engineering.
